Arlington, VA 22207 | 703-651-6036 | [noahkingkaiser@gmail.com](mailto:noahkingkaiser@gmail.com) | | [github.com/hfsyntax](https://github.com/hfsyntax) | [noahkaiser.vercel.app](https://noahkaiser.vercel.app)

## EDUCATION

### James Madison University

*Bachelor of Integrated Science and Engineering in Computer Science*

Arlington, VA

*Aug. 2019 – May 2023*

## EXPERIENCE

### Freelance

May 2024 – Present

*Full-Stack Web Developer*

*Remote*

- Great Vibe Events - Optimize website performance by rebuilding the architecture using **Next.js**, leveraging **server-side rendering (SSR)** and **caching** to reduce load times. Design and implement a **PostgreSQL** Database to store returning customer data and process event forms electronically.
- Pick6 - Refactor legacy **PHP** codebase to **TypeScript** with **Next.js**, improving scalability and maintainability. Update **MySQL** database provider to **Neon** with **PostgreSQL** to eliminate monthly database storage costs. Implement virtualized rendering with **react-window** to optimize tables with large data, reducing unnecessary re-flows.
- Discord Bot Development - Maintain and update multiple **Discord** Bots written in **discord.js** using **TypeScript** for servers up to **2,000 users**. Create/manage each individuals bot's database infrastructure through **Supabase** with **PostgreSQL**. Integrate developer tools like **Postman** and **BetterStack** to monitor applications up-time on each web-server deployed through **Render**.

### System Management Technology Inc.

December 2023 – April 2024

*Web Developer*

*Falls Church, VA*

- Reduced the course-based training software's page content load time from **5 seconds to under a second** by converting **callback functions** to **ES8 async/await syntax**.
- Rewrote the course-based training software's **user interface** using **JavaScript** and **CSS** and made course components **responsive**.
- Created and modified page content and test content course components to extend features for course-building.
- Added **SCORM API** functions to the course-based training software to collect and store online learners test responses.

### System Management Technology Inc.

Jun 2018 – July 2018

*Data Entry Clerk*

*Falls Church, VA*

- Transcribed information from military technology manuals to create **SCORM** course modules for military students.
- Review and modify existing **XML/HTML** documents associated with **SCORM** course modules.

## PROJECTS

### Pick6 | *Next.js, Neon, Node.js, PostgreSQL, Tailwind CSS, TypeScript, Vercel*

July 2023 – Present

- Created a Fantasy Football site to process **excel** player data into a **PostgreSQL** database for over **1,000 users**.
- Allow all users to make team selections, manage their profile data and view other users' statistics.
- Allow administrators to upload game results, manage users, configure timer settings, and modify old season data.

### CrossyOff | *Next.js, Neon, Node.js, PostgreSQL, Tailwind CSS, TypeScript, Vercel*

July 2019 – Present

- Built a **responsive** website for tracking competitive Crossy Road player data for over **50 users**.
- Created pages for data analytics including tournaments, player statistics and leaderboards.
- Added **form validation** for submitting high scores and send a **Discord Webhook** of the data for server moderators to validate.

### Biomium | *CSS, Node.js, JavaScript, Render, Tampermonkey, Socket.io*

August 2018 – July 2019

- Created an enhanced **user interface** for **30+ users** for the website game biome3d.com externally loaded through **Tampermonkey**.
- Added savable style settings and hotkeys for built-in and added game components using **localStorage**.
- Created a mini map that was later expanded to a **Socket.io** server for multiplayer experience.

## TECHNICAL SKILLS

**Languages:** CSS, HTML5, JavaScript, TypeScript, SQL

**Developer Tools:** FileZilla, Git, Neon, Postman, Render, Tampermonkey, Vercel

**Frameworks/Libraries:** MySQL, Next.js, Node.js, PostgreSQL, React, Tailwind CSS
